Quick Start Guide

Watch

Charger

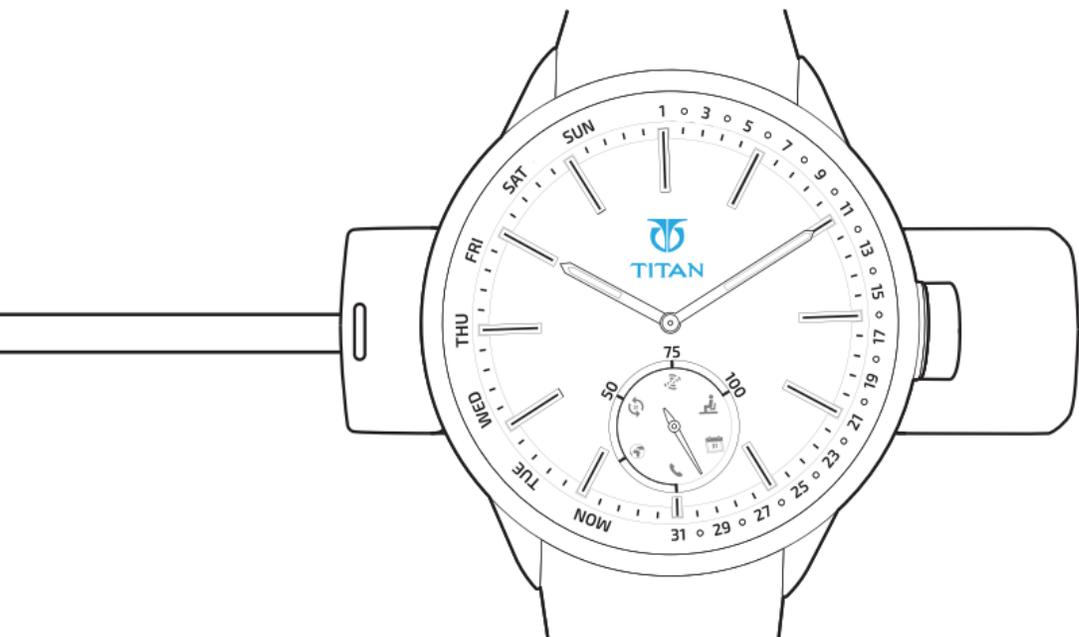

USB cable

# Getting started

---

## Pairing the watch for the first time:

Once you get your watch, charge your watch with the included charger. The watch will vibrate twice and the offset hand will start moving, which indicates the watch has been activated. Post this, Bluetooth will remain ON at all times.

### Installing the Watch App

Please download the "Titan Connected" app from the Google Play Store or the Apple App Store.

### Pairing the Watch with the App

Open the App and follow the on-screen instructions. Select "Titan 1785" and then select the Watch variant. You will be taken to the pairing screen. Click on 'start pairing' and the phone will begin searching for the watch.

*Note: It is recommended to keep the watch close to the phone during the pairing process. Your phone's Bluetooth & Location should be on to pair the watch*

**A** Looking for your watch

## B Finding your watch

Once the watch is found, the App will display the same. Select the watch and click on 'Start Pairing' to complete the pairing process.

# Pairing Successful

---

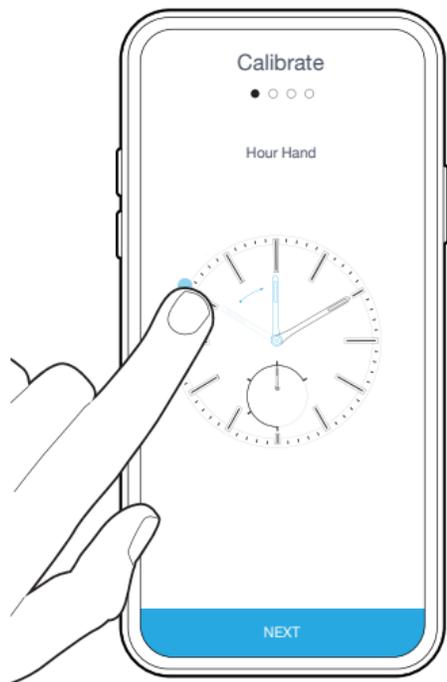

---

Once the watch is successfully paired, Tap 'Next' to continue

# Calibration of Watch

---

## A Calibration of Hour hand

In the calibration page, align the hour hand in the App to match the hour hand on the watch. Tap 'Next' when complete and the hour hand will move to the 12H position and the App will move to the 'Minute Hand Calibration' page

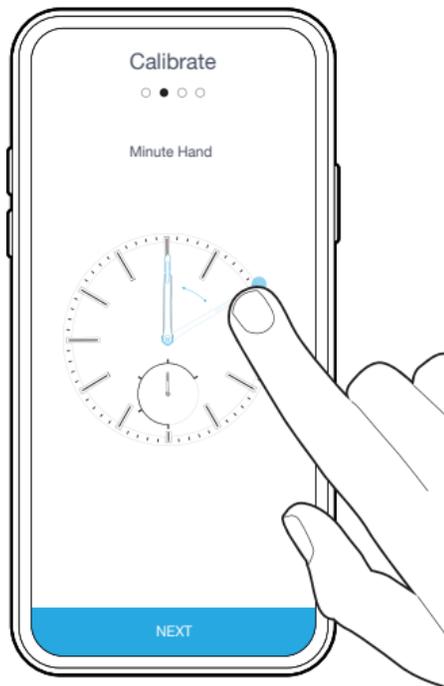

# Calibration of Watch

---

## B Calibration of Minute hand

Align the minute hand position in the App to match the minute hand on the watch. Tap 'Next' when complete and the minute hand will move to the 12H position and the App will move to the 'Offset Second Hand Calibration' page

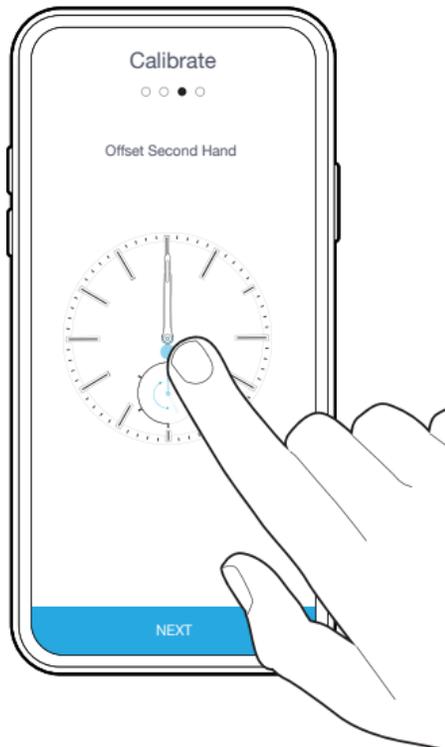

# Calibration of Watch

## C Calibration of Offset Second hand

Align the offset second hand in the App to match the offset second hand on the watch. Tap 'Next' when complete and the offset second hand will move to the 12H position and the App will move to the 'Minor Adjustment' page

# Calibration of Watch

---

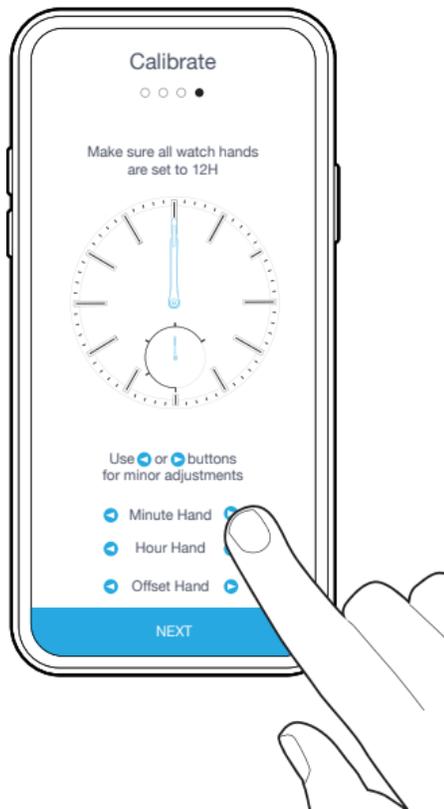

## D 'Minor Adjustment' of all hands

In case the hands are not aligned exactly to 12H, please make minor adjustments for the hands as required.

Click 'Next' to complete the calibration process and the watch hands will move to the current time.

*Note:*

*Once syncing is done, if the time is inaccurate, please use the 'Calibrate' feature on the app to correct the same.*

# Features

---

# Activity Tracker

---

1. Press the 3H push button once and Offset hand will show the progress of activity in percentage

2. Activity completion percentage will be Indicated on the offset dial

3. Once you achieve your steps target (100%), the hour hand and minute hand will move together to celebrate your achievement.

# Day/Date

---

1. Press the 3H push button two times consecutively and Offset hand will Show the Day & Date mode
2. The Date and Time is automatically taken from The mobile and displayed by the center hands (Hour & Minute)
3. Minute hand indicates the Date and Hour hand indicates the Day
4. Feature will be displayed for 5 seconds

# Secondary Time Zone

---

1. Press the 3H push button three times consecutively and the offset hand will show the secondary time zone mode

2. Pre-set second city time is taken from the mobile app and will be displayed on the watch

3. Feature will be displayed for 5 seconds

*Note:*

*Select a second city from 'Second Time Zone' option in the app*

# Find Your Phone

---

1. Press the 3H push button for 3 seconds (continuously), 'Find My Phone' feature gets enabled and phone starts ringing with blink of flash light.

2. To stop the 'Find my Phone' feature, press 3H push button again for 3 seconds

*Note:*

*This feature will work only after you enable the 'Phone Finder' option in the app.*

# Link Loss

---

In case the watch loses connection with the smartphone, the Offset second hand will point towards the 'Link Loss' icon and the watch will vibrate twice.

# Sedentary Reminder

---

For a particular sedentary interval set in the Mobile App, the watch vibrates and the Offset second hand will point to the 'Sedentary Reminder' icon if it doesn't sense movement after the set interval.

*Note:*

*Enable 'Sedentary Reminder' feature and set the interval time from the mobile app 'Notification' section.*

# Call Notification

---

In case of incoming calls, the watch vibrates to indicate the same & the Offset second hand will point to the call notification icon

For the 'Priority Calls' set in the mobile App, the hour and minute hand points to the order of the priority set in the App, e.g. Priority of a certain number is set to 2, in case of call, both hour and minute hands would point to digit 2.

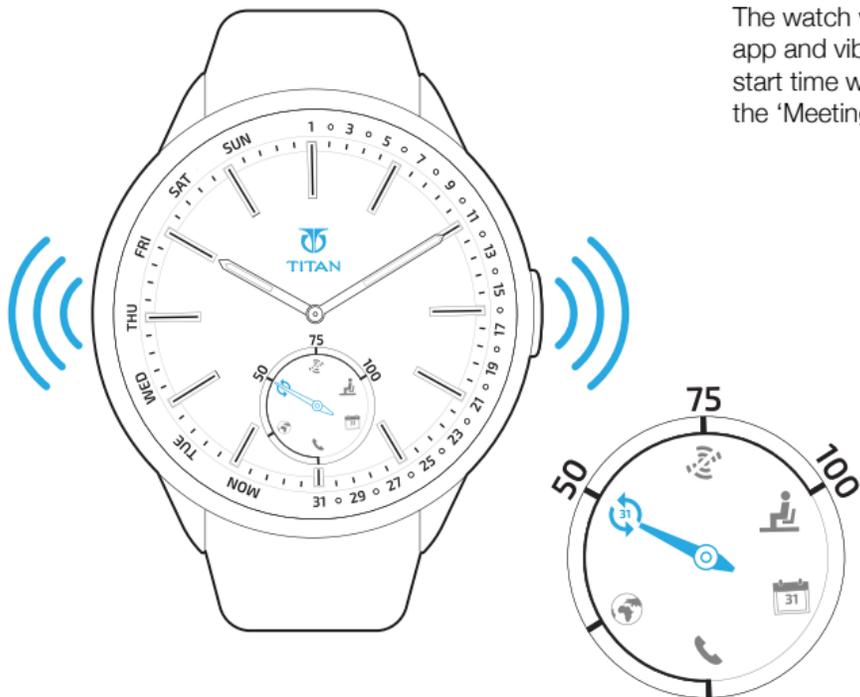

*Note:*  
Enable 'Call Notification' feature and set the 'Priority Contacts' from the mobile app 'Notification' section.

# Meeting Reminder

---

The watch will sync to the native calendar app and vibrate 10 mins before the meeting start time with the offset hand showing the 'Meeting Reminder' mode.

# Product Specifications

---

Case	Dimension Case Material Glass Material Strap	44 X 13 mm 316 Stainless steel Mineral Glass Genuine Leather / Metal Strap
Movement & Sensor Information	Watch Movement Sensors Connection Feedback	Titan Micro motor Accelerometer Bluetooth LE 4.0 Vibrator
Battery	Battery Life Battery type Battery Capacity	5 Days (Full Smart) + 45 Days (Normal Watch) Li Ion Polymer 60 mAh
Water Resistance	Rating	5ATM/50m

## Instructions for use

Recommended temperature range when using this smart watch: 0-55°C Please do not use this smart watch when showering, in the sauna or other areas where it will be exposed to hot water or steam so as to prevent it from being damaged. Please do not put the watch in areas with a strong magnetic field, such as near magnets.

# Hazardous / Toxic Substances / Elements

Component Name	Lead (Pb)	Mercury (Hg)	Cadmium (Cd)	Hexavalent Chromium (Cr(VI))	Polybrominated Biphenyls (PBB)	Polybrominated Diphenyl Ethers (PBDE)
PCBA Board	X	0	0	0	0	0
Outer Casing	0	0	0	0	0	0
Metal	X	0	0	0	0	0
Battery	0	0	0	0	0	0

The table was prepared pursuant to the provisions of SJ/T 11364.

0: Indicates that the content of all the hazardous substances in the homogeneous materials of this part is below the limit requirements specified by GB/T 26572.

X: Indicates that the content of all the hazardous substances in the homogeneous material of this part exceeds the limit requirements specified by GB/T 26572. The information provided in this table is based on the data provided by the suppliers. At current technology levels, the use of all hazardous substances is controlled to the minimum.

The product complies with ROHS requirements for environment protection. Currently there is no mature technology globally to replace or reduce the lead content in electronic ceramic, optical glass, steel and copper alloy.

The green lifespan - Environmental protection lifespan of the product is 10 years, and the label is shown in the figure on the left. The green lifespan for a replaceable part such as the battery may be different from that of the product. The green lifespan is valid only when using the product under normal circumstances described in the manual.

Disclaimer: Titan Company Limited has the right of final interpretation of this manual.

# FCC Statement

---

1. This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:
  - (1) This device may not cause harmful interference.
  - (2) This device must accept any interference received, including interference that may cause undesired operation.
2. Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna. Increase the separation between the equipment and receiver.

- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

- Consult the dealer or an experienced radio/TV technician for help. RF warning statement:

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.

# CE Statement

---

Max RF power level:  
BLE(2402-2480MHz)-5.2dBm

**RF exposure information: The Maximum Permissible Exposure (MPE) level has been calculated based on a distance of d=0 cm between the device and the human body. To maintain compliance with RF exposure requirement, use product that maintain a 0cm distance between the device and human body.**

Hereby, Titan Company Limited declares that the radio equipment type (Smartwatch 90099, 90099SL01, 90099SL02) is in compliance with Directive 2014/53/EU.

The full text of the EU declaration of conformity is available at the following internet address:

# Note on the accuracy of Activity Tracker

---

Activity trackers are intended to be tools to provide you with information to encourage an active and healthy lifestyle. Activity trackers rely on sensors that track your movement and other metrics. The data and information provided by these devices are intended to be a close estimation of your activity and metrics tracked, but may not be completely accurate, including the step, sleep, distance, and calorie data. Activity trackers are designed to track repetitive walking motions as steps. Arm movement while walking will be captured by the internal accelerometer of the device, and will record each complete swing of the arm as two steps.

Note - Accurate user data (height) information provides better accuracy. Some activities may cause frequent arm movement resulting in the device recording too many steps:

- Driving a vehicle (usually due to rough terrain)
- A restless night of sleep

There are also instances where a lack of arm movement may result in a loss of steps while you are walking:

- Pushing a stroller or shopping cart
- Carrying a bag of groceries or child
- Talking on phone and walking

Activity trackers are not medical devices, and the data provided by them is not intended to be utilized for medical purposes and is not intended to diagnose, treat, cure, or prevent any disease. We recommend you consult your doctor before engaging in any exercise routine.
